Reading Landscapes
Envisioning Landscapes

WORKSHOPS

- June 2020 Workshop Conducted under the webinar series titled "Tracing Landscapes through Memory"

MISSION AND VISION FOR LIFE

Spending childhood with nature I have a strong connect with environment around and the natural resources (Water, Land, Vegetation) which hold a significant place in my life and further Understanding the necessities of today's world and impact on the environment take me to spread awareness in the societies.

Hence the necessity of Environmental education come into the picture which will help connects me to the world around us, teaching about both natural and built environments will raise awareness of issues impacting the environment upon which we all depend, as well as actions we can take to improve and sustain it.

In future i want to serve the society in the rural area, spreading awareness of significance of nature in our life and guiding them to contribute to the planet's ecosystems in a practical sense to be able to preserve the unique sense of place
