## BIODATA

Vijaya is an architect and professor with over 30 years of experience. She has taught subjects relating to Design and Technology at institutions in Mumbai and Pune, and mentors' students from their first to their final year. She regularly presents her work at research forums and has been a jury member at several colleges. In her practice, Vijaya works closely with her clients, channelling their lives and experiences in her designs. Vijaya favours a multidisciplinary approach to architecture, which she feels enriches it as a discipline. She loves to read and listen to Hindustani classical music

#### Professor of Architecture / Architect / Interior Designer

---

30+ years of experience in training students of architecture with a view to enhance their outlook and approach to architecture using effective and efficient methodologies. A proven track record in teaching various subjects varying from Design and Building Technology to Building Services. Vastly experienced in tutoring students from their first year in the basics of design, to guiding them in their final years for their thesis. Experience includes teaching in institutes such as BKPS College of Architecture and DY Patil College of Architecture in Pune, and SNTD Mumbai and LS Raheja College of Architecture in Mumbai.

An Architect and Interior Designer with an established professional track record in delivering customized solutions. As a specialist in 'space design' has helped a couple of schools in Pune maximize their space needs. On the retail front, redesigned "Banjaras" – a retail clothing outlet in Aundh, Pune. Besides these, have also delivered interior design solutions to homes in Aundh, Baner and Kharadi in Pune. A long-cherished dream of being able to 'restore' a heritage structure – the Brother Deshpande Church situated in Kasba Peth, Pune.

Participated in professional forums and presented papers on a range of subjects such as - "Teaching Building Technology and Service in Architecture", "Healthy Cities : Perspective of Asian Concerns", "Emerging Trends in Architecture and Allied Fields", "Smart Cities : Approaches, Opportunities & Challenges" and most recently a presented a paper in Stevens Institute of Technology, New Jersey, USA having been invited to the forum "Education, Design and Practice - Understanding Skills in a Complex World".
